Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claim 12 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter as being an abstract idea because a software program is not tangibly embodied in a manner so as to be executable and it is a non-functional descriptive material without implemented and executed by the computer. Thus, this claim 12 is not tangible.

The prior arts of record further do not teach a system for conducting commerce over the Internet comprising: a web server for producing a web page having variables therein that incorporate data said variables having variable names that incorporate XML path information; and a database for storing the data in an XML type format based on the XML path information whereby said server creates another web page for a client software based on the data in the XML type format.

The examiner considers the applicants' claims 1-11 to be allowable based on the claim interpretation and the aforesaid prior arts of record.
